FRIDAY MORNING, FEB. 12, 1864.

Rebel Correspondence. The following, among other letters, were forwarded to us from Tullshoma, by Capt J. M. Bishop, of the 4th Tennessee cavalry. They were captured by a member of Co. C, of that regiment, while on a scout. One of the writers promises to be here by the 1st of February, when his time expires. The new rebel conscription law will doubtless interfere with his aspirations, however. We print the letters verbatim :

It is a system of short hand writing, which can be written ten times as fast as the common writing, read as easily, and learned with far less trouble.

It is used not only by Repurters, but by hundreds of thousands in this country and in England, for private writing, for competition, for taking testimony, etc.; in courts, for sermons, for correspondence, for book-keeping, etc., etc.; by Ladies, by Students, by Cherks, by Clergyman, by Lawrers, etc., and is rapidly control to your parallely. ng into general use. As a labor saving invention, its value can suarcely estimated, and it requires but little time to learn to use it for the daily purposes of life. But the on-cotion is made that others cannot read it! Well then let them spend a few hours to fearn it, for where re let them spend a few hours to learn it, for where we the justice in requiring the active and intelligent to spend ten days in doing what they might do in one, merely to save the indolent a few hours effort in learning a thing which would be useful to them for lifer The time was when but few persons could write their names, but the progress of the age domands a more rapid method of writing, and while the netive and intelligent more and with have the advantages of Phonography, the indolent must submit to the dissolventage caused by their own info-leace.

The case with which it can be brought into profitable and daily use is shown by the following certificates. It is only those who are spaceant of it who over speak against it. Nasuvalin, Dec. 13th, 1800] Mr. J. W. DOLERAN: Siz: The few issuent I took from you some time since in Phonography, have enabled me to save more than two-thirds of the labor in propering my sermons, and I have no doubt it will soon coable me to save three-fourths of it. I have never spent time more profitably than in its attanement, and I see perfectly from in recommending it to Chrowene measure.

free in recommending it to Clergymen generally, as a means by which a wast amount of time may be saved and that too with far less effect than in generally sup-posed. Its principles are few and simple, of easy attainment and suited to the full expression of every word in the intguage, either for present use or per-manent record. Yours respectfully, Pastor of the 24 Prophylerian Church, Nashville, Tena, Nasevilla, August 1, 1869.
In about sty months from the time I began the study of Phonography, with less than one-third of said time devoted to its attainment, I was employed as Reporter for the United Status Board of Glaims. The faithful leaching of Mr. J. W. Dolbear, of Nash-wille, and the study and practice of the concine, compreheusive, and Judiciously arranged phonographic cooks of Sen Pitman, of Chedrasti, have thus easily Nashville.

enabled me to make Phonography practically useful. Its principles are quickly mastered, and I know of nothing that young persons can learn with equal pros pect of immediate and profitable employment, The Secretary of War has ordered, July 6th, 1863, in "General Order No. 205, phonographic reporters employed under the authority of the 18th section of the act of Congress, approved March 3, 1863, will be allowed not exceeding ton deliars per day," etc. This will of course greatly increase the den Otard and Hennessy Cognac BRANDIES; DUNGAR H. DURRIE. Namewitte, August 4, 1863.
In January last Mr. J. W. Dolberr gave, free of Figs, a course of lossons in Phonography and Wrt. ting to myself and many other wounded midders in Rospital No. 20. Tediens hours were thus changed to pleasant and profitable cars. We value highly our knowledge of Phonography, and those who have left the Bospital correspond in it with those who have not. W. E. Dervin, of Company F. 18th W. S. A., who returned haves disabled for life from his wounds, writes that he is teaching Phonography, and finds it so profitable that he would not take \$1,000 for what he learned from Mr. D. I think both soldiers

and office a would find the learning of H a profitable employment for their leisure time in camp or heaptal, without detriment to other dation.
W. G. SHAFER, Cirrix Hospital No. 20 If Photography were taught to every modder in the army, Mr. D. believes most of them would value it Piper's Heidsick, and other Brands as highly as the pay they receive from the discernmant, without in two least interfering with their da-tion as soldiers.

How, Thomas H. Beeros said in Congress:

"Had this art been known forty years ago, it would have saved me twenty years of hard inhor."

If Phonography is thus valuable in maving as large an amount of a lifetime, should not every civild have lie vast advantages, especially when they can be had at se small an expense of time and memory? If it would have saved twenty years of hard labor to the ide of one man, should years of hard labor to the itte of one man, should yours of hard tabus be brought upon others for the want of a blessing of such oney attainment?
